
XOR with ONE triceptron + skip:
$f = \sigma(0.05x_1)x_2 - x_2/2 \approx 0.0125\,x_1x_2$
Unit circle with TWO triceptrons + skip:
$f \approx 0.0125(x_1^2 + x_2^2)$, level set (white) vs circle (red)
x_1
x_2
unit circle
